

Foreword

The *Traffic Manual* is intended to provide instruction and guidance to department personnel who conduct traffic operations and design activities. This manual identifies state and federal laws and departmental directives, policies and publications that are used to aid in decision making for traffic operations and design issues. It also provides standards to assure uniform application of operational methods and traffic control devices statewide.

Updating the *Traffic Manual* is a continuing process and revisions are issued periodically. Questions, observations and recommendations are invited. The next page is provided to encourage comments.
